

# TURN SERVICES COMPANY ANNOUNCEMENT

## **Turn Services Named Operator of Intergulf Fleet in Houston, Texas**

Strategically located on the Houston Ship Channel, Intergulf Fleet has space to fleet 52 barges with additional space available for future expansion. The close proximity to several major refining and chemical facilities makes Intergulf Fleet the ideal location for barges waiting to access these facilities. Initially, two towboats will be dedicated to the fleet servicing our customers' fleeting and shifting needs in the Houston Ship Channel area. Additional horsepower will be positioned at Intergulf as demand from our customers requires.

Mario Muñoz, Turn's President, commented on the expansion, "We are very excited to establish a location in Houston to help us further service our customers' needs in this market just as we do on the Mississippi River. We anticipate expanding our service offerings in the future to include shifting services to Beaumont and Corpus Christi." Trevor Lott will manage Intergulf Fleet for Turn Services. For additional information or service inquiries, Trevor Lott can be reached at *251.622.0664*.

*Turn Services is one of the largest independent fleeting and shifting companies in the United States. The company, founded in 1990 and headquartered in New Orleans, Louisiana, provides a variety of services to companies operating on the inland waterways of the United States.*
